Affected version:	1.0.0 (B6a)		

Description

The Atom editor in windows build anyways Beta1&2 also same issue RC3, as in the screen shot you will see it stops or the code ends about 33/34 lines from the bottom.

If you type under the last line of code it just keeps adding another blank line onto the bottom again.

See screen shot for more information on this and the grey scroll pot issue. Here you see it happens after line 42437 (blank area underneath).
