Category:		Estimated time:	0:00 hour
Target version:	0.9.5		
Affected version:	0.9.4		

Description

In the last version I had 0 errors with "Variable XXX used without been declared"...
In the new version I have 72...

ASnd some of them is "fun":

```
Dim Grid(675)
Global Grid()
```

This throws an error on "Grid()" in the global statement.
Its hard to declare it in any better fashion? :)
