

AOZ Studio Beta - Bug #131

Mid\$, Right\$, Left\$, Yet another (weird) problem

02/05/2020 01:14 PM - David Baldwin

Status:	Closed	Start date:	02/05/2020
Priority:	Normal	Due date:	
Assignee:	Francois Lionet	% Done:	0%
Category:		Estimated time:	0:00 hour
Target version:	0.9.6.1		
Affected version:	0.9.4		
Description			
My contender for 'Weirdest Bug' award.			
This code throws up an internal error:-			
<pre>S=12345 S2\$="000000" S1\$=Str\$(S) SL=Len(S1\$)-1 S1\$=Right\$(S1\$,SL) Right\$(S2\$,SL)=S1\$</pre>			
If it is changed to this (ie: adding something to the end of line 6, no error:-			
<pre>S=12345 S2\$="000000" S1\$=Str\$(S) SL=Len(S1\$)-1 S1\$=Right\$(S1\$,SL) Right\$(S2\$,SL)=S1\$ //No error now</pre>			
Or this:			
<pre>S=12345 S2\$="000000" S1\$=Str\$(S) SL=Len(S1\$)-1 S1\$=Right\$(S1\$,SL) Right\$(S2\$,SL)=S1\$:</pre>			

History

#1 - 02/12/2020 10:15 PM - David Baldwin

Now, in version 0.9.5, this code is causing a phantom entry in the application.js code.

```
this.vars=
{
  .""
}
```

Code extracted from both compiled versions:-

```
this.aoz.setRight$(this.vars.S1$, {name:"S2$", type:2}, this.vars.SL); <-- This is the working one.
```

```
this.aoz.setRight$(this.vars.S1$, {name:"", type:2}, this.vars.SL); <-- Note the name is "S2$" is missing - not working.
```

#2 - 03/07/2020 05:14 PM - Francois Lionet

- Status changed from New to Resolved

- Target version set to 0.9.6.1

Fixed!

#3 - 03/13/2020 10:10 PM - David Baldwin

- Status changed from Resolved to Closed
