Description

Copying this AMAL code from the AMOS professional (07.06.17) manual causes issues in the AMAL transpiler.

```
A$="AUtetest (If R1<>XM Jump Update"  
A$=A$+"If R1<>YM Jump Update else eXit"  
//A$=A$+"Update: Let R0=XM; Let R1=YM; Direct M)"  
// commented the above line out just incase XM and YM where not implemented  
A$=A$+"Update: Let R0=100; Let R1=100; Direct M)"  
A$=A$+"M: Move R0-X,R1-Y,20; Wait;"
```
