Le problème est résolu, mais il y a une latence de 1 à 2 secondes entre l'appui sur le bouton de la souris, et sa détection.

Le code de test (celui de la documentation 3.8) :

```
Curs Off
Do
  Locate 0,0
M= Mouse Key : Print "Bit Pattern ";Bin$(M,8);" Number ";M
Loop
```

La latence semble plus courte sur mon PC, moins de 1 seconde (mais reste sensible, c'est pas immédiat).
