

AOZ Studio Beta - Bug #282

Welcome Application fails with Drive Not Found error.

03/01/2020 04:56 PM - Brian Flanagan

Status:	Closed	Start date:	03/01/2020
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0:00 hour
Target version:	0.9.9.3		
Affected version:	0.9.6		
Description			
<p>With the release of version 0.9.6, the Welcome application fails with Drive Not Found error on line 28. Line 28 tries to load the logo from the default resources folder. <i>The <u>default resources</u> folder is MISSING in this release. Copied default resources from previous version. This did NOT correct the problem.</i></p> <p>Copied back the missing folder structure:</p> <pre>...Roaming default resources filesystem AMOSPro_Examples iff Logo.iff</pre> <p><i>Copying the file structure to the application's local resources/filesystem folder corrected it.</i></p> <pre>welcome resources filesystem AMOSPro_Examples iff Logo.iff</pre> <p>Perhaps Load Iff is not being scanned properly to connect to the default resources if needed? NOTE: Dir\$ has a similar problem. It also can't find the default resources. (See bug #159.)</p>			

History

#1 - 07/22/2020 08:23 AM - Brian Flanagan

- Status changed from New to Closed

- Target version set to 0.9.9.3

This is working now. Actually was fixed a long time ago...
