AOZ Studio Beta - Bug #309

When in full screen mode, resizing the browser window causes display to disappear.

Target version:				
Affected version:	0.9.6.4			

Description

Run the following:

```
#fullScreen: true
cls 3
Print "Hello"
Ink 1
Draw 0,0 to Screen Width,Screen Height
Draw Screen Width,0 to 0,Screen Height
```

Then, try to resize the web browser window. When you do, the window goes black, and won't redaraw.
There should be an onresize event for the browser window, to correct this.

Sorry, bad example. The above example actually works, if the program is left running...
but here's an example that does exhibit this issue.

Just run the baox game, then try resizing the browser window.
