I believe this has happened because FL did not like using ' as a comment marker,(I guess it is not the approved method these days) so did a 'Find and Replace' on all occurrences of it.

Keep in mind too, that there is a *third* option for that question as well, since */* and **/* are also used for comments.
There were a couple of those questions that had issues.

Laurant, OK pour que je t'affecte les bugs relatifs au tutoriels?

Utiliser ' pour les remarque ne se fait plus du tout! En mode Amiga c'est accepte, mais pas en mode PC. Il suffit de changer les remarques...
