Description

Hi, I've had a problem with the Input instruction in AOZ Studio.
I think the first version was 0.9.9.2 Test 3 and now the problem remains in 0.9.9.3 Test 2a.
The input is not recognized in either when enter is hit, the cursor moves a space now but nothing else.
Is everyone having this problem or is it something to do with setup. Scancode recognizes the key.
