

AOZ Studio Beta - Bug #520

Several Bob problems

09/28/2020 07:28 AM - Brian Flanagan

Status:	Resolved	Start date:	09/28/2020
Priority:	High	Due date:	
Assignee:	AOZ Developers	% Done:	0%
Category:		Estimated time:	8:00 hours
Target version:			
Affected version:	1.0.0 (B7)		

Description

1. **Get Bob** appears to get the Bob starting at the wrong origin. (offset by 1 pixel x and y)
2. **Get Bob** appears to get the Bob in the wrong size. (appears to be about 3 pixels off x and y)
3. In Amiga mode, **Get Bob** is getting an anti-aliased image, but shouldn't be. (Bob should look identical to original.)
4. **Bob** appears to draw the bob in the wrong place offset down and right by 1 px. (Is it *possible* that the Hot Spot origin is off too?)

Similar problems exist in BOTH Amiga and AOZ modes. (See example below)

```
#manifest: "amiga"
#splashScreen:false
/*
    Bob size & origin issue (RC3)
    Bob also may be placing the Bob offset by 1 pixel X & Y.
    In Amiga mode, Get Bob is anti-aliased.
    (I scaled the display up to make it easier to see the problems.)

    The same problem exists in AOZ moe.
*/
Screen Open 0,800,600,32,Lowres
Screen Scale 5,5
cls 0 : Flash Off : Curs Off
// Draw an 11 x 11 pixel box with an X in it.
Ink 1
Draw 10,10 to 20,20
Draw 10,20 to 20,10
Polyline 10,10 To 20,10 To 20,20 To 10,20 To 10,10

Get Bob 1,10,10 To 20,20 // Get the exact thing that was drawn as a Bob.
Bob 1,30,10,1    // The bob's origin is off by 1 px down and right, and size is off by 3 px x and
Y.
Wait Key
Get Bob 2,9,9 To 22,22 // I had to move the origin back a pixel (x and y), and increase the size b
y 3 (x and y)to get the whole box.
Bob 2,50,10,2    // The Bob is drawn 1 pixel down and right from where it should be.
Wait Key
Bob 1,29,9,1     // The bob is restored to where it should be (offset by 1 pixel left and up)
Bob 2,49,9,2     // The bob is restored to where it should be (offset by 1 pixel left and up)
                // Perhaps the Hot Spot is is the wrong place?
End
```

History

#1 - 01/31/2021 08:01 AM - Brian Flanagan

- Priority changed from Normal to High

NOTE: In the example given, remember there are Wait Key statements to separate different parts of the test.

#2 - 01/31/2021 08:04 AM - Brian Flanagan

While testing, you may also want to change the scale to bigger than 5,5 (maybe try 16,16) to more easily see the issues.

#3 - 04/30/2021 11:46 AM - Brian Flanagan

- Assignee changed from Francois Lionet to AOZ Developers
- Estimated time changed from 2:00 h to 8:00 h
- Affected version changed from Beta RC3 to 1.0.0 (B7)

Get Bob is offset in 1.0.0 (B7).

```
Palette 0,$FFFFFF,$FF0000,$00FF00,$0000FF,$FFFF00,$00FFFF,$FF00FF
Screen Scale 0,4,4
Curs Off
```

```
Pen 1 : Paper 0
Cls 0
For BobNum=1 To 6
    Ink BobNum+1 : Box 1,1 To 10,10
    Get Bob BobNum,1,1 To 11,11
Next BobNum
Cls 0

x = 10 : y = 10
For BobNum=1 To 6
    Bob BobNum,x + BobNum*20, y,BobNum
Next BobNum
```

The above example will miss the left and top pixels of the object.
If I change the Get Bob to start a 0,0 then the whole object will be grabbed.

#4 - 09/08/2021 11:46 AM - David Baldwin

- Status changed from New to Resolved
