| <b>Affected version:</b> | Beta 1          |                        |            |

#### Description

For example: The following works (and should NOT).

```
#manifest: "aoz"  
'#amigaFont: "news" ' 23  
Palette 0,$FFFFFF  
Ink 1  
Set Font "news",23  
Text 0,23,"In the beginning, God created the heavens and the earth."
```

Using the // or /\* \*/ comments works though.

#### History

##### #1 - 11/17/2020 12:45 PM - Brian Flanagan

- Priority changed from Low to High

- Affected version changed from Beta RC3 to Beta 1

NOTE: They are also still processed if the double slash is used without a space before the #

NOTE: The single quote comment will still be processed event if there is a space before the #.

##### #2 - 11/17/2020 01:30 PM - Brian Flanagan

- Subject changed from Tags are processed when commented if single quote comment is used. to Tags are sometimes processed when commented.

Examples:

These commented tags still run, but shouldn't

```
// #amigaFont: "news"  
' #amigaFont: "news"  
' #amigaFont: "news"  
/* #amigaFont: "news" */
```

Only these are OK:

```
// #amigaFont: "news"  
/* #amigaFont: "news"  
*/
```

A related error:

```
/* #amigaFont: "news"  
*/
```

The close comment on the above will cause an error, since the open comment wasn't recognized properly.

##### #3 - 11/17/2020 03:23 PM - Francois Lionet

- Status changed from New to Resolved

- Assignee set to Francois Lionet

- Target version set to Beta 1

Fixed!
