AOZ Studio Beta - Bug #66

Field statement fails on Random file.

Affected version:	0.9.5			

Description

When file is opened as Random, it fails with a "File type mismatch" error at column 1 of the Field statement.

```
Open Random 1,"DF0:myfile"
Field 1,28 As NAME$
```

DF0 has been created in the filesystem folder.
Commenting the Field statement, and adding a Close 1 will create "myfile", so I know the path is correct.

Tested 0.9.5.1. Field statement no longer causes a file type mismatch, HOWEVER, the example fails for other reasons.
