

## AOZ Studio Beta - Bug #672

### Wait command in Amiga mode

02/24/2021 07:17 PM - Paul Kitching

<b>Status:</b>	Closed	<b>Start date:</b>	02/24/2021
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>	Francois Lionet	<b>% Done:</b>	0%
<b>Category:</b>		<b>Estimated time:</b>	1:00 hour
<b>Target version:</b>	1.0.0 (B7)		
<b>Affected version:</b>	1.0.0 (B5)		

**Description**

When using an Amiga manifest, the wait command works in seconds (like AOZ mode), instead of in 50ths of a second.

wait 50  
This should wait 1 second, instead of 50 seconds.

### History

#### #1 - 03/22/2021 06:42 AM - Brian Flanagan

- Estimated time set to 1:00 h

- Affected version changed from 1.0.0 (B4) to 1.0.0 (B5)

Tested in 1.0.0 (B5)

Wait is still incorrect in Amiga manifest.

Example:

```
#manifest: "amiga"  
T=Timer : Print T  
Wait 50  
Print Timer-T
```

#### #2 - 03/31/2021 03:59 PM - Francois Lionet

- Status changed from New to Resolved

Works!

#### #3 - 04/01/2021 09:40 AM - Brian Flanagan

- Status changed from Resolved to Feedback

Nope. Check the time.

Wait 50 still waits for 50 seconds instead of 1.

#### #4 - 04/01/2021 02:33 PM - Francois Lionet

- Status changed from Feedback to Resolved

Please close it this time! :D

#### #5 - 04/02/2021 12:42 AM - Brian Flanagan

- Status changed from Resolved to Closed

- Target version set to 1.0.0 (B7)

The problem was that the local manifest was overriding the manifest specified in the #manifest tag!

I would think that the *opposite* should be true.

The #manifest tag is supposed to choose the specified manifest, but it doesn't.

Once I deleted the local manifest, I found it was working correctly, so this particular problem is corrected.

I'll open a new ticket for the manifest issue.
