

AOZ Studio Beta - Bug #776

Filesystem: Append not working.

06/11/2021 07:40 AM - Brian Flanagan

Status:	Resolved	Start date:	06/11/2021
Priority:	High	Due date:	
Assignee:	Baptiste Bideaux	% Done:	0%
Category:		Estimated time:	24:00 hours
Target version:	none		
Affected version:	1.0.0 (B8)		

Description

The following example generates an Internal Error at the **Close 1** statement:

```
Append 1,"info.txt" ' Should open info.txt on the default file system if it exists, or create it i
f it doesn't.
```

```
Print #1,"APPENDED" ' Write something to the file.
```

```
Close 1 ' Close the file (Get Internal error here)
```

I tested this where info.txt **does** exist, and can be read using **Open In 1** and **Line Input #1,X\$**
