Target version:	none			
Affected version:	1.0.0 (B8)			

Description

Major problem here! (Tested in B8 v14 macOS.)

For example:

```
TestCase
TestCase
TestCase
End

Procedure TestCase
    x=1 : X=2
    y=3 : Y=4
    z=5 : Z=6
    Print x,X,y,Y,z,Z
End Procedure
```

The result is:

```
2    2    4    4    6    6
2    2    4    4    6    6
2    2    4    4    6    6
```

...instead of:

```
1    2    3    4    5    6
1    2    3    4    5    6
1    2    3    4    5    6
```

History

#1 - 06/14/2021 10:04 AM - Brian Flanagan

- Status changed from New to Closed

I was told that this is now the *new* standard for AOZ Studio. Both keywords AND variables will be treated as case-insensitive in both the Amiga and AOZ manifests.

Closing this ticket.
