<b>Affected version:</b>	1.0.0 (B8) u15		
<b>Description</b>			
Hitting F6 the first time will open the pull-out help. Hitting F6 while the help is open should close it.			

#### History

##### #1 - 09/22/2021 10:59 AM - Brian Flanagan

- Subject changed from F6 (pull-out) help only works the first time called. to F5 and F6 help only works to open.
- Assignee changed from AOZ Developers to Baptiste Bideaux

These should be toggles. (I thought this used to work.)

F5 or F6 opens help

F5 or F6 again while the associated help window is open should CLOSE the help window.

##### #2 - 09/22/2021 11:00 AM - Brian Flanagan

- Subject changed from F5 and F6 help only works to open. to F5 and F6 help only work to open.

##### #3 - 09/22/2021 11:00 AM - Brian Flanagan

- Subject changed from F5 and F6 help only work to open. to F5 and F6 keys only work to Open open. (Should also close - toggle.)

F5 window has been done away with now in the current ver 1.x U43, as it was double handling.

Note: Yes alot did like the quick inst/func help all the same. (I for one).

F6 tho does not close the help in the current version no, only open.

Yes it would be good if it did this (close f6 toggle) again same key.
