Found the problem. The comparison on the label is case sensitive, but it is not supposed to be.
If I change the label to "startofdata", it works.

- Subject changed from Restore Label$ doesn't work. to Restore Label$ form of restore is using a case-sensitive compare. It is expecting all lower case. (Should be an easy fix.)

#4 - 10/21/2021 08:32 AM - Brian Flanagan

- Status changed from New to Resolved

Re-tested in 21 Oct 2021 version.
It's working now in both manifests.
Thanks to whoever fixed it. ;-)

Verified with previous as well as new test code:

```
For x=1 to 5
    Read Y : Print Y,
Next x

Restore "startofdata"
Print : Print

For x=1 To 5
    Read Y : Print Y,
Next x
End

StartOfData:
Data 1,2,3,4,5
```
