Affected version:	1.0.0 (B16) u27		

Description

Probably related to bug [#391](#)

Sometimes AOZ gets stuck running the PREVIOUS program transpiled.
It does the same thing with both the AOZ Viewer, as well as transpiling to the web browser.

No matter what program I have open, AOZ re-runs the previous programs transpiled.

When this happens, it appears that closing and re-opening AOZ corrects the problem.

This is intermittent. It may be difficult to reproduce.

Tested in new vesion of AOZ from .git as of 11/27/2022.
