AOZ Studio Beta - Bug #962

If Errn$ is called, and errn is 0, it causes "Message not found undefined" to appear instead.

12/03/2022 07:19 PM - Brian Flanagan

Status:	Resolved		**Start date:**	12/03/2022
Priority:	Low		**Due date:**	
Assignee:	AOZ Developers		**% Done:**	0%
Category:			**Estimated time:**	0:00 hour
Target version:	none			
Affected version:	1.0.0 (B16) u27			

Description

Example:

```
Print ERRN,ERR$
End
```

Result is:

```
0   Message not found undefined
```

The ERRN prints properly, but ERR$ returns a bogus message.
I think it would be appropriate to return an empty string when ERRN is 0.

Tested in newset version from git as of 11/27/2022 (macOS).

- Status changed from New to Resolved

Fixed! It now displays an empty string.
